Dylan Thornburg
ELEN 120 Lab 8 Prelab

Write a 1-3 sentence description of each deliverable in Lab 8:

D1. Deliverable one is our code that we used to make the lcd screen display "santa clara" (with delays) and a video of it working. We will use let2font to format the ascii letters.

D2. Deliverable two is similar to one except instead of santa clara, we will display numbers 1-5 and 2-6. We will use num2font to format the ascii numbers.

D3. Deliverable three is our code and a video showing that our code works correctly. We will use kpadscan to help display a pressed keypad character on the lcd screen.
